

Leading New ICT Creating a Smart City Nervous System

SCEWC 2018 & Huawei Smart City Summit

Nov. 13-15, 2018 | Gran Via 2, Barcelona · Spain

LEADING NEW ICT

Dear Mr. Ulrich Ahle, Mr. Stefano de Panfilis and Mr. Juanjo Hierro,

The IoT, cloud computing, Big Data, AI, and other ICT technologies are developing at an accelerated speed. The value of innovations being made in city governance, municipal administration, public services, commercial development, and others, is seen clearly by the day as these technologies help advance the construction of smart cities at a steady pace. Huawei is dedicated to constructing a beneficial smart city ecosystem and platform.

The 8th Smart City Expo World Congress (SCEWC) will be held on November 13-15, 2018 in Barcelona. Huawei is joining this event using 'Leading New ICT, Creating a Smart City Nervous System' as theme, preparing to demonstrate Huawei and partners' smart city solutions and successful practices by 520m² booth.

During the event, Huawei will hold a Global Smart City Summit on the afternoon of November 13. We have invited opinion leaders, city constructors, and experts from all industries and corners of the world to share their experience and thoughts on smart city construction as well as to coordinate efforts, share facts, and engage in constructive discussions, joining hands to capture the opportunities brought by digital transformation and technological progress.

We extend our sincere invitation to this grand event. Welcome!

Yan Lida

Director of the Board, President of the Enterprise BG, Huawei
