

We believe modern hospitals need carefully designed software systems to ease the strains of managing hospitals in an effective manner.

We serve with our Professional Team who follow technological developments closely, comprehend and explain, educate, reply the questions accurately and seriously, solve the problems and adopt the value and principals of the society.

We will be deligted to share our experience gained by 22 years in the industry and to begin new cooperations with you.

## TIPPLUS

# HOSPITAL INFORMATION MANAGEMENT SYSTEMS

### **ABOUT TIPPLUS**

- TIPPLUS is brand of our HIMS. (Hospital Information Management Systems)
- TIPPLUS HIMS, founded in 1996, has been providing the highest quality information systems and management services to the health care industry for more than 22 years. Our active, private ownership has remained focused on the company's guiding principles as we have grown to meet the support service needs of the nation's many medical facilities.
- Our approach is based on forming partnerships with our clients in order to tailor programmes and softwares that address the unique needs of each facility and the priorities of each administration. We proactively manage all HIMS services, equipment, supplies, and staff. This allows our clients to concentrate on their core business: Clinical Healthcare.
- TIPPLUS HIMS is proud to have earned a reputation for excellence by consistently delivering resources and results that exceed our partners' expectations. We believe it is because of this commitment to quality that most of our business continues to come from referrals, the heart of any good business. We pledge to uphold this tradition by providing the highest quality hospital information and management services and by growing one satisfied customer at a time.

We Speaks Your Language

#### **TIPPLUS RIS**

#### (Radiology Information Systems)

- TIPPLUS RIS (Radiology Information System) is compatible with all DICOM 3.0 compliance devices.
- TIPPLUS RIS includes PACS server and PACS viewer. Radiology, Doctor Polyclinic and Inpatient Modules include PACS viewer.

#### TIPPLUS LIS (Laboratory Information Systems)

- More than 400 different brand and model laboratory equipment is integrated with the TIPPLUS LIS (Laboratory Information System).
- TIPPLUS LIS is a computer information system that manages laboratory information for all the laboratory disciplines such as clinical chemistry,hematology and microbiology.
- Laboratory Information Systems provide modules for sending laboratory test orders to the instruments through its multiple instrument interfaces, some of which are known to have as many as five hundred, track those orders and then capture the results as soon as they become available. The result can then be analysed and a report is generated from it.
- This report can be sent off for printing at a specific point, sent off to other systems either to be added to the patient's electronic medical record or to be used for billing.
